THIN-LAYER CELL

Detailed Action

1. Applicant's request for reconsideration filed on July 29, 2008, was received. Claims 1-7 were amended. Claims 8 and 9 were added.

Objections

2. The objection to claim 1 is withdrawn because Applicant has amended claim 1 to clarify the recitation.

Claim Rejections—35 USC §112

3. The rejection under 35 U.S.C. 112, second paragraph, of claim 7 is withdrawn because Applicant has amended claim 7 to remove indefinite language.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance: the amended claim 1 recites a process for producing a flow cell for spectroscopic analysis, in which first and second transparent windows are provided, the second having at least two sample flow channels; a structured thin layer is applied to one window; the thin layer is temporarily lowered in viscosity and sealingly contacted with the other window to delimit a flow chamber; an adjoining filling chamber between the windows is filled with adhesive; and the thin layer is then removed. The prior art of record, Howitz et al. (WO

Art Unit: 1791

02/21115), discloses a process for producing a flow cell for optical analysis, in which first and second windows are contacted via a structured thin layer therebetween defining a sample flow chamber, and an adjoining filling chamber between the windows is filled with adhesive, as described in the Office Action mailed April 29, 2008. The process of Howitz et al. differs from the instant claim 1 in that Howitz et al. do not disclose lowering the viscosity of the structured thin layer, nor finally removing the thin layer. Claim 1, as well as claims 2-9, which properly depend upon and further limit claim 1, are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
